

GREEN AQUA TECH

WATER PURIFICATION SIMPLIFIED

As end-to-end suppliers of sustainable wastewater management solutions our core focus is on industries that generate wastewater as a by-product of their operations.

2014

Why Choose Us

Cost Effective

Recommendations backed by research

Global Quality Benchmarks

Handcrafted in-house quality parameters

Timely Delivery

Enabled by implementation experience

Transparency

Systematic documentation, reporting and sign offs

With stricter environment pollution norms Indian industries are looking for partners like Green Aqua Tech who can provide sustainable wastewater treatment solutions at their facility with an understanding of their business objectives.

Our **primary role** is researching, connecting and sourcing resource effective chemical treatments and equipment.

Our **fully equipped research** lab is a hub for testing and quality clearances of chemical treatments and equipment sourced by us.

Proactive Partnership

We visit each client's facility to understand, assimilate, demonstrate and recommend sustainable solutions.

Key Product Variants

- Specialized Bio-culture solutions
- Waste water treatment chemicals
- All types of filtration media
- Water analysis, testing and monitoring equipment

Turn Key Projects and Equipment

- Effluent & Sewage treatment plants
- Zero liquid discharge / Recycle/ Reuse systems
- Industrial Reverse Osmosis
- Water softeners
- De-mineralization (DM) plants
- Membrane process
